

The CHeKT Proactive Visual Security Platform

How to transform enterprise security from reactive to proactive protection in just minutes.

With CHekT, Video Isn't An Afterthought → It's The Frontline

Rather than simply recording video like passive systems, the CHekT Proactive Visual Security Platform transforms AI-driven video analytics into actionable alarm events — real-time visual verification and control from any device.

THE OLD WAY

Traditional video security systems record footage of what happened — they don't stop it.

THE CHekT WAY

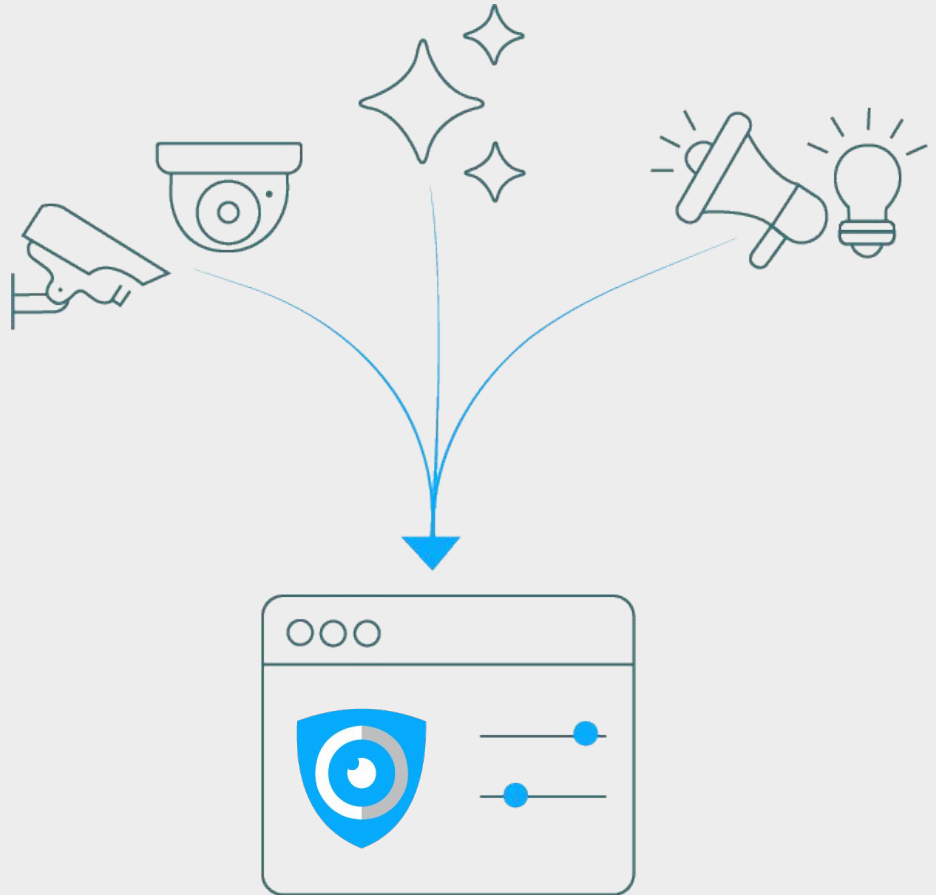

CHekT's software verifies alarms in real time, triggering precise and immediate responses.

Connect the CHEKT Video Control Panel and turn existing security infrastructure into a streamlined, proactive alarm platform — no costly overhauls or retraining required.

Connect In Seconds Get Instant Proactive Visual Security

Easily connect your existing systems — including cameras, AI software, and deterrents like sirens and strobe lights — to the CHEKT Video Control Panel.

CHeKT's browser-based system unites customers, dealers, and monitoring centers in a single secure cloud ecosystem.

With everyone seeing the same real-time video and event data, responses are faster, service is seamless, and operations stay perfectly aligned.

Shared Proactive Visual Security From A Single Dashboard

FOR DEALERS

→ Dealers and integrators can securely manage customer accounts, configure new installations, monitor device health, fine-tune analytics, define alarm zones, and provide remote support when needed.

FOR
MONITORING
CENTERS

→ Operators access the most advanced RVM interface, seamlessly integrated with existing alarm automation software for up-to-the minute visual awareness and fully proactive protection.

FOR END USERS

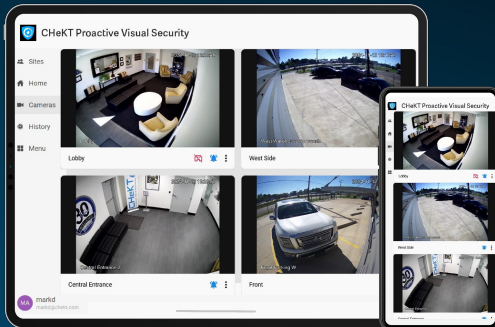

→ Customers can watch live and recorded video, review events, manage notifications, arm or disarm their systems, through their connected devices — as authorized by their dealer.

Complete Control At Your Fingertips

Real-time alarm verification turns every alert into action.

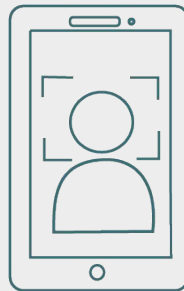

Operators move beyond observation — they filter out false alarms before reaching dispatch, intervene on threats before they escalate, and make faster, smarter response decisions.

REAL-TIME VIDEO ALERTS

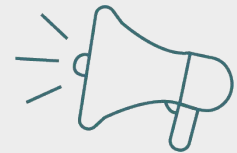

VERIFY

REMOTE VERIFY

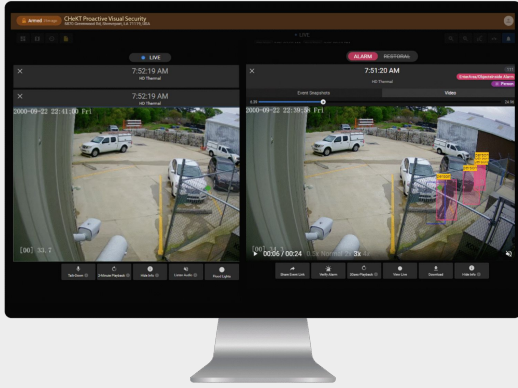

**ELIMINATE
FALSE ALARMS**

**DETER
AUTOMATICALLY**

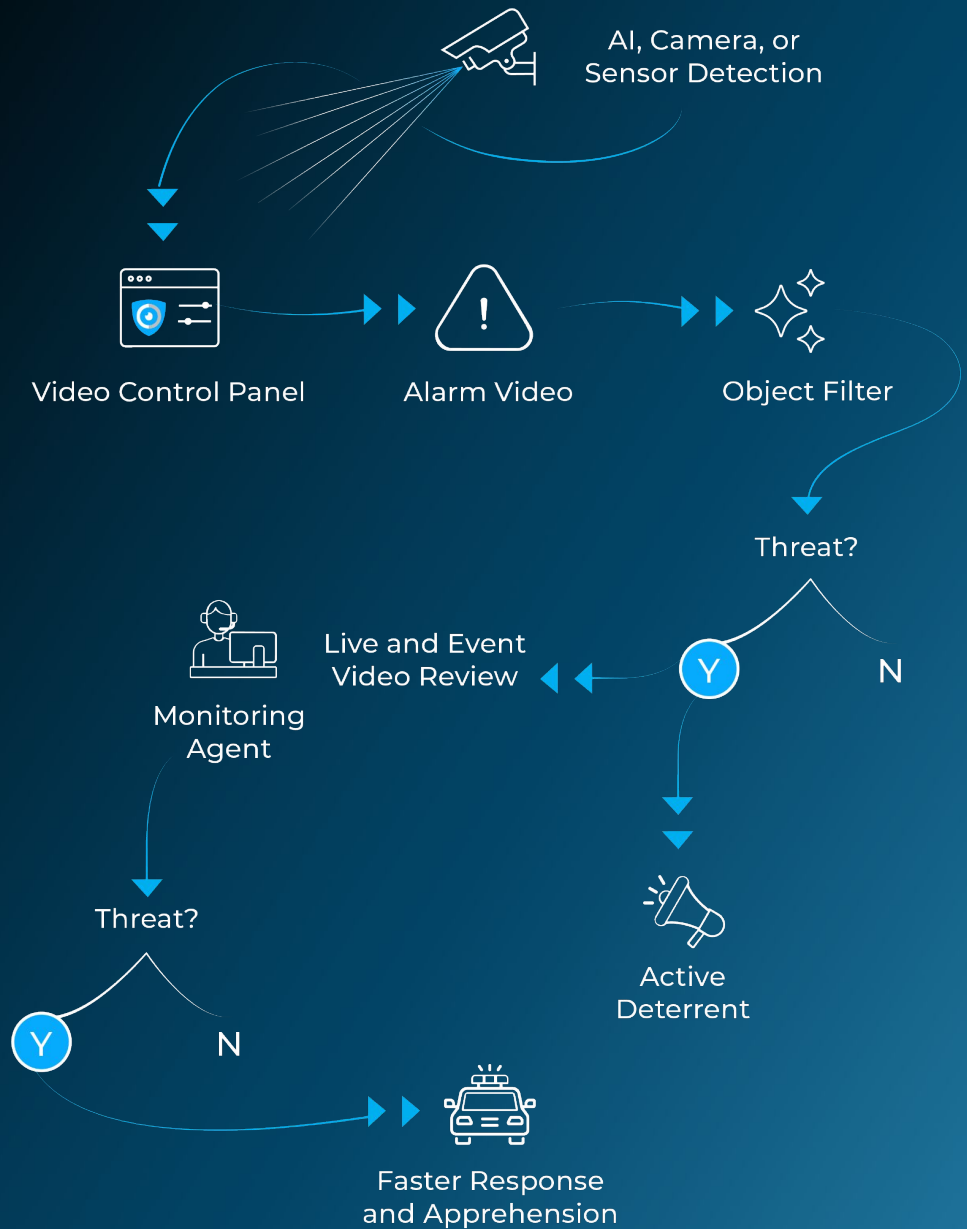

**DISPATCH
IMMEDIATELY**

With the CHekT Proactive Visual Security Platform:

- ✓ Cameras act as intelligent detectors
- ✓ AI analytics eliminate false alarms and reduce noise
- ✓ Operators verify in real time, not after the fact
- ✓ Audible and visual deterrents de-escalate threats
- ✓ Verified video accelerates police response

Transform Security Cameras Into A Proactive Alarm System

Your Proactive Visual Security Checklist

Detect, deter, and stop crime before it happens with the only proactive visual security solution proven to deliver fast, accurate protection using the systems and devices you rely on every day.

Unified Security Ops	Seamlessly integrates with existing systems to reduce total cost of ownership (TCO).
Analytics To Alarms	Instantly converts AI insights to actionable events while filtering everyday motion from potential threats.
Remote Video Monitoring	Automatically pairs live video with alerts to show exactly what triggered an alarm.
Cloud Integration	Secure management of devices, events, arm/disarm systems, and access footage from anywhere.
Custom Alarm Zones	Simplifies the setup of high-risk perimeters for more focused protection.
Intuitive Interface	Immediately triggers lights, audio, or dispatch when fast action is required.
Real-Time Response	Wirelessly provides access to camera feeds and event playback from any device.
Take Action Remotely	Easily control relays, conduct talk-downs, and connect other devices directly from the mobile interface.

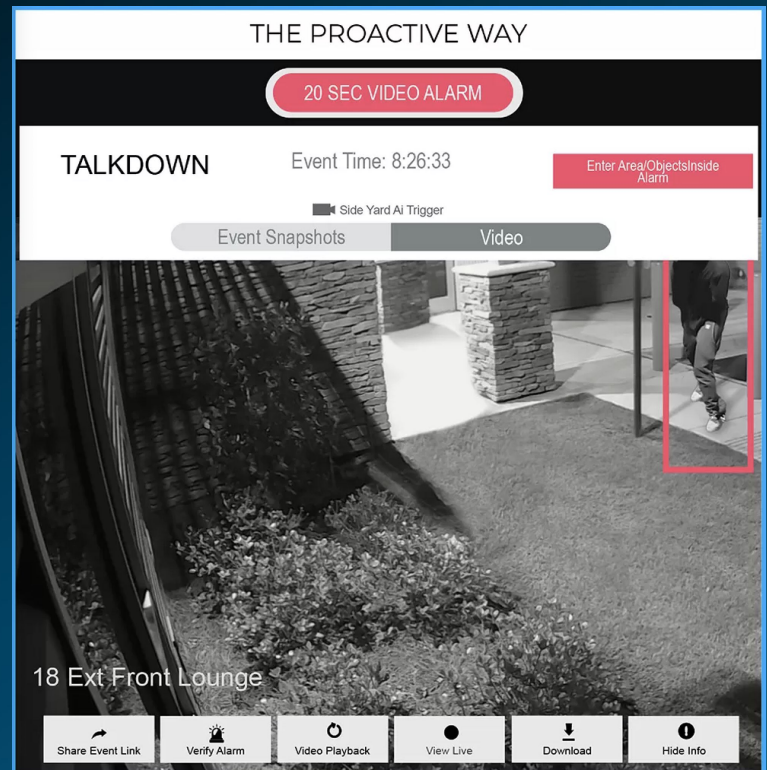

See How Easy It Is To Transform Your Security Operations

Built on a cloud-based platform, CHeKT acts as a gateway for next-gen technologies and third-party integrations — from AI servers to access control to facial recognition — delivering smarter, more competitive security that protects people and powers providers.

Ready to make the switch from reactive to proactive visual security?

Let us show you how.

With CHeKT, video isn't an afterthought — it's the frontline. Every camera, every alarm, and every AI tool work seamlessly in one cloud platform to prevent crime in real time. What was once reactive is now proactive.

We provide security integrators, monitoring centers, and the people they protect a Proactive Visual Security Platform that seamlessly integrates with the systems they use everyday and enables them to quickly identify what triggered an event, and the tools they need to instantly verify, deter, and ensure an immediate response.

Today, our platform powers proactive security for thousands of companies worldwide. With the backing of Alarm.com (NASDAQ: ALRM), we're scaling fast while staying independent and true to our dealer-first roots.
