

The CHeKT Proactive Visual Security Platform

How to transform enterprise security from reactive to proactive protection in just minutes.

With CHeKT, Video Isn't An Afterthought → It's The Frontline

Rising threats — including organized retail crime, internal theft, workplace violence, and supply chain attacks — require proactive solutions that stop risk at the source.

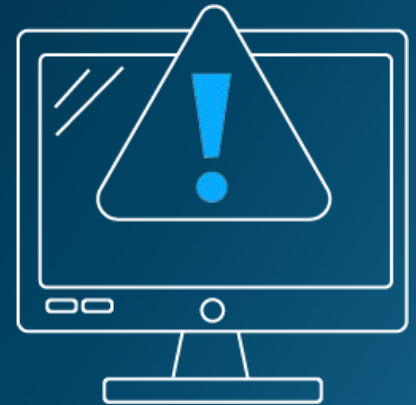

Unlike passive systems that simply record video, the CHeKT Proactive Visual Security Platform turns AI-driven video analytics into actionable alarm events — delivering instant visual verification and control from any device to prevent loss before it happens.

THE OLD WAY

Traditional video security systems record footage of what happened — they don't stop it.

THE CHeKT WAY

CHeKT's software verifies alarms in real time, triggering precise and immediate responses.

The CHEKT Video Control Panel unifies AI analytics, cameras, alarms, and IP speakers providing:

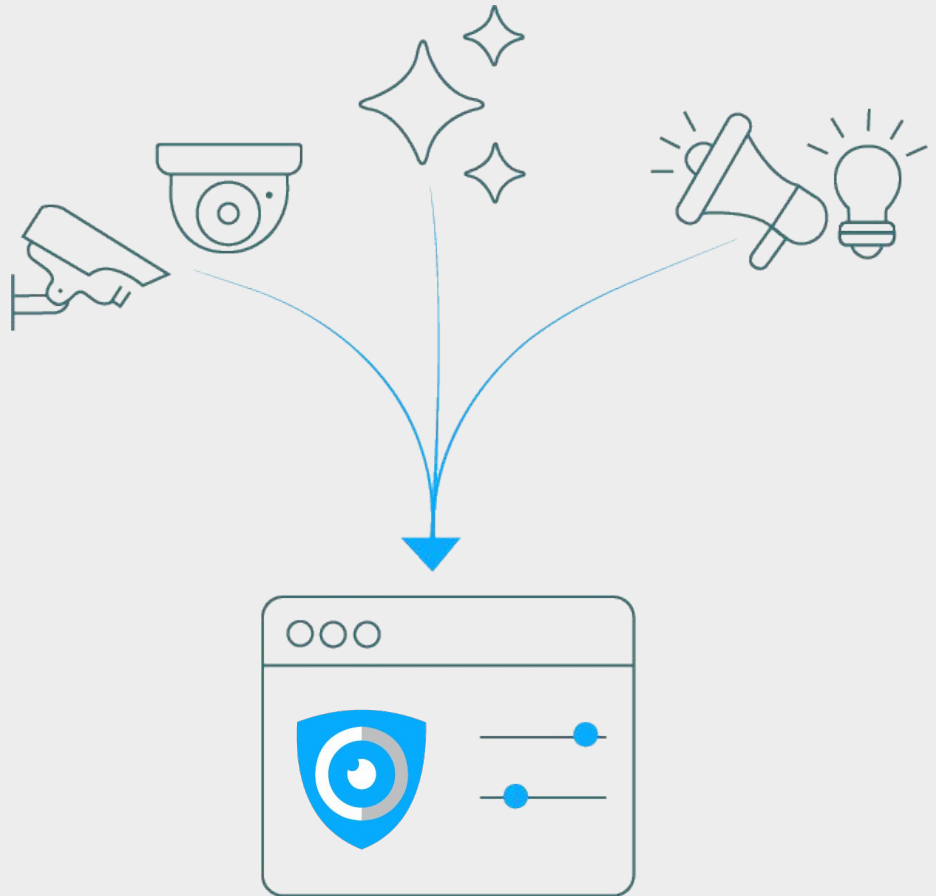

Proactive Threat Prevention:

Delivers real-time intelligence across multiple sites to detect and disrupt emerging threats.

Reduces Total Cost of Ownership (TCO):

Connects to existing infrastructure eliminating the need for costly system overhauls and emergency modernization.

Connect In Seconds Get Instant Proactive Visual Security

Easily connect your existing systems — including cameras, AI software, and deterrents like sirens and strobe lights — to the CHEKT Video Control Panel.

Shared Proactive Visual Security From A Single Dashboard

Whether you're a security leader shaping strategy or managing a SOC, consolidating all devices into a single, easy-to-use system across your business ecosystem, enables you to:

- ✓ **Reduce losses** by identifying theft, fraud, and risks early
- ✓ **Keep people safe** with real-time visibility and rapid response
- ✓ **Empower law enforcement** with verified, actionable intelligence
- ✓ **Maximize ROI** by reducing shrink, claims, and operational friction

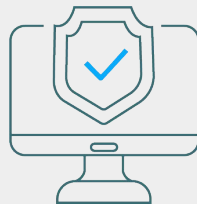

STRATEGIC ADVANTAGE FOR SECURITY LEADERS

Streamline management, reduce risk, improve team alignment, and gain enterprise-wide visibility and real-time intelligence to identify and stop threats before they impact your business.

Modernize your operations while reducing total cost of ownership (TCO) with a unified system that effectively mitigates loss, protects your people, and keeps ahead of emerging threats.

OPERATIONAL ADVANTAGE FOR SECURITY OPERATORS

Enable operators to monitor multiple sites through a cloud-based dashboard, verify alerts in real time, and accurately detect suspicious behavior, unauthorized access, or perimeter breaches.

Extend laser-focused coverage without adding headcount by enabling immediate visual verification, false alarm filtering, automated deterrence, and remote monitoring of pre-defined alarm zones.

BUSINESS ADVANTAGE FOR BACK-OFFICE MANAGEMENT

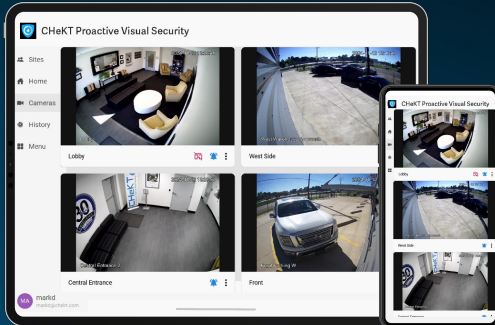

Leverage analytics from video, access control, and security systems to identify trends, measure ROI, prioritize risk reduction, and provide insights into compliance and performance.

Prevent loss, reduce shrink, and drive tangible ROI through lower insurance premiums, optimized headcount, and streamlined investigations using verified video footage.

Complete Control At Your Fingertips

Real-time alarm verification turns every alert into action.

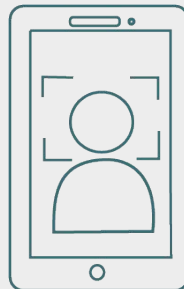

Operators move beyond observation — they filter out false alarms before reaching dispatch, intervene on threats before they escalate, and make faster, smarter response decisions.

REAL-TIME VIDEO ALERTS

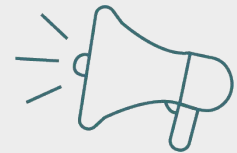

VERIFY

REMOTE VERIFY

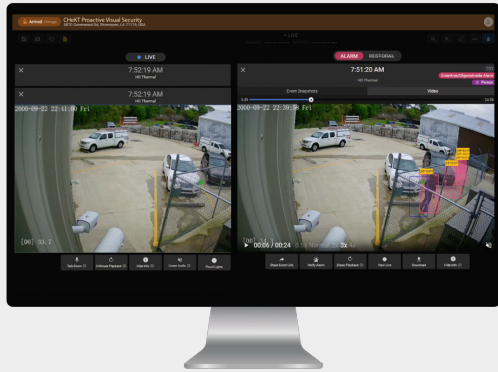

**ELIMINATE
FALSE ALARMS**

**DETER
AUTOMATICALLY**

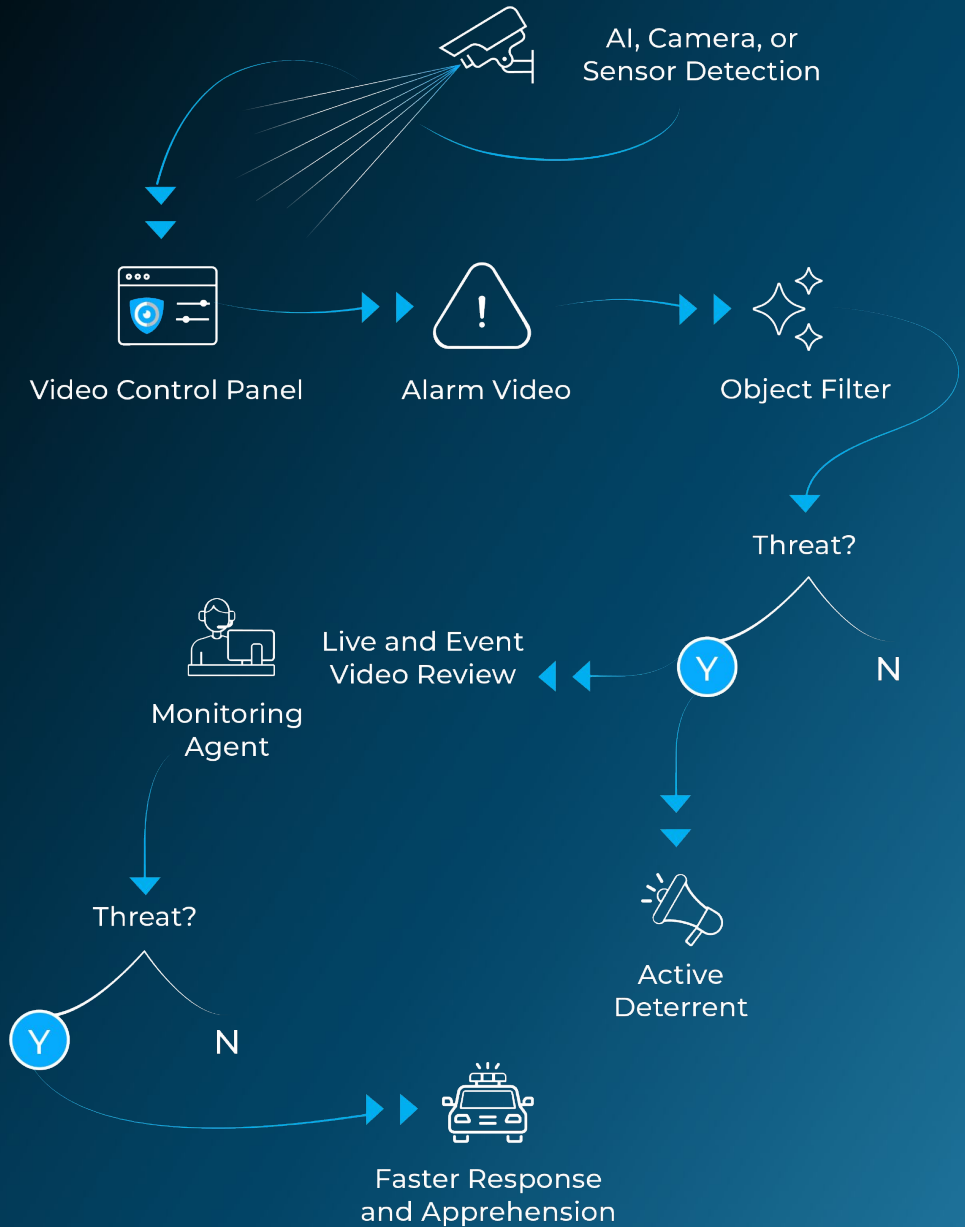

**DISPATCH
IMMEDIATELY**

With CHEKT Proactive Visual Security Platform:

- ✓ Cameras act as intelligent detectors
- ✓ AI analytics eliminate false alarms and reduce noise
- ✓ Operators verify in real time, not after the fact
- ✓ Audible and visual deterrents de-escalate threats
- ✓ Verified video accelerates police response

Transform Security Cameras Into A Proactive Alarm System

Your Proactive Visual Security Checklist

By adopting CHeKT Proactive Visual Security, organizations can protect people, preserve assets, and strengthen business performance.

Unified Security Ops	Seamlessly integrates with existing systems to reduce total cost of ownership (TCO).
Analytics To Alarms	Instantly converts AI insights to actionable events while filtering everyday motion from potential threats.
Remote Video Monitoring	Automatically pairs live video with alerts to show exactly what triggered an alarm.
Cloud Integration	Secure management of devices, events, arm/disarm systems, and access footage from anywhere.
Custom Alarm Zones	Simplifies the setup of high-risk perimeters for more focused protection.
Intuitive Interface	Immediately triggers lights, audio, or dispatch when fast action is required.
Real-Time Response	Wirelessly provides access to camera feeds and event playback from any device.
Take Action Remotely	Easily control relays, conduct talk-downs, and connect other devices directly from the mobile interface.

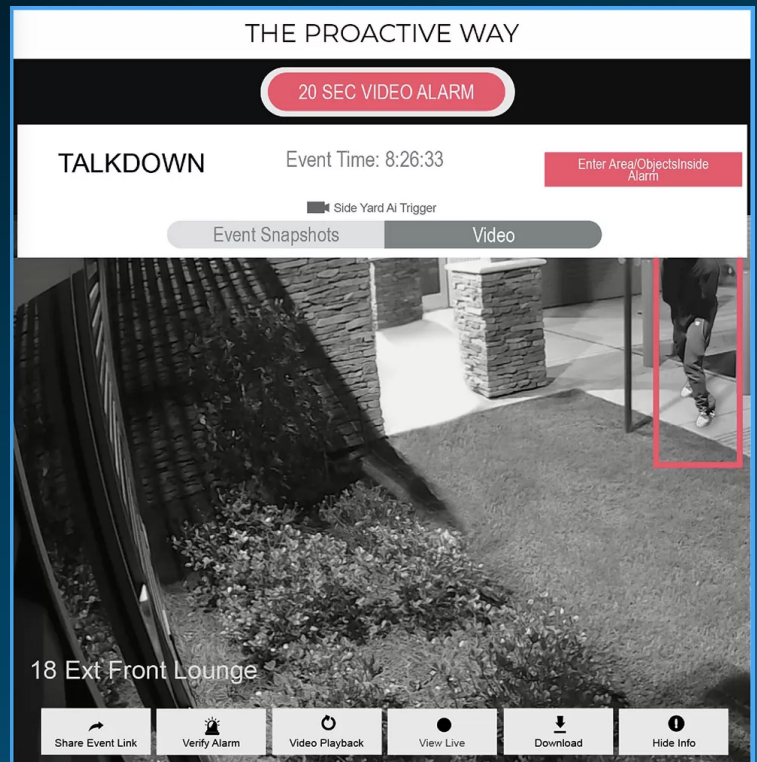

See How Easy It Is To Transform Your Security Operations

Built on a cloud-based platform, CHeKT serves as a gateway for next-gen technologies and third-party integrations — from AI servers to access control — helping leaders deliver intelligent, powerful, security that protects people and assets, eliminates false alarms and fire drills, and responds faster to real incidents before they escalate.

Ready to make the switch from reactive to proactive visual security?

Let us show you how.

[BOOK A DEMO TODAY](#)

With CHeKT, video isn't an afterthought — it's the frontline. Every camera, every alarm, and every AI tool work seamlessly in one cloud platform to prevent crime in real time. What was once reactive is now proactive.

We provide security integrators, monitoring centers, and the people they protect a Proactive Visual Security Platform that seamlessly integrates with the systems they use everyday and enables them to quickly identify what triggered an event, and the tools they need to instantly verify, deter, and ensure an immediate response.

Today, our platform powers proactive security for thousands of companies worldwide. With the backing of Alarm.com (NASDAQ: ALRM), we're scaling fast while staying independent and true to our dealer-first roots.
